EXPERIENCE

Freelance Web Developer

September 2024 – October 2024

Freelance/Independent Contractor

Bengaluru, Karnataka

- Developed MVP for a crypto web application implemented authentication features (login/signup) and built a user dashboard for tracking crypto assets and managing account settings.
- Enhanced UI and Mobile Responsiveness for Existing Web Application

HSPM Solutions

June 2023 – July 2023

Front End Developer Intern

Remote

- Assisted in development of the front end of a landing page using ReactJs and Tailwind CSS.
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.

PROJECTS

Spill-D-Muzic | *Typescript, Reactjs, Nodejs, Postgresql*

- A collaborative music streaming platform where users can create spaces, invite others to join, and contribute songs to a shared playlist. Designed a responsive, user-friendly interface with Next.js and Tailwind CSS, and used Prisma for efficient data management and secure access control.
- [Github Link](#)

Paytm Clone | *Typescript, Reactjs, Nodejs, Postgresql*

- Developed a Paytm clone application using a monorepo setup with Turborepo. Implemented essential Paytm features, including user authentication, a wallet system, and payment functionality. Built with a modern, aesthetic interface using React and Tailwind CSS, ensuring a responsive, engaging user experience across devices.
- [Github Link](#)

E-commerce Clone | *Typescript, Reactjs, Nodejs, Postgresql*

- Built a sleek e-commerce app with separate dashboards for users and admins. The user side makes shopping easy, with features like browsing, order tracking, and a smooth checkout. On the admin side, there's everything needed to run the store, like inventory control, order management, and insights into user activity. Designed to look great and work well on any device!
- [Github Link](#)

Studynotion | *Javascript, Reactjs, Nodejs, MongoDB*

- Built Studynotion, an online learning platform similar to Udemy, where users can browse and enroll in courses across various subjects. The app allows instructors to create and sell their courses, while students can track their learning progress and access course materials anytime. Focused on creating an easy-to-use, responsive platform with smooth course management for both learners and instructors.

TECHNICAL SKILLS

Languages: Javascript, Typescript, C++, HTML, CSS (Tailwind)

Frameworks: React, NodeJs/ExpressJs, React Native, NextJs

Developer Tools: Git and Github, Docker, VS Code

Databases: MySQL, Postgresql, MongoDB, Prisma ORM, Mongoose

EDUCATION

Cambridge Institute of Technology

Sep 2022 – Current

B.Tech in AIML

SUMMARY

- A full-stack developer with a passion for creating impactful, user-friendly applications. I'm comfortable across the stack, whether it's setting up a monorepo with Turborepo, handling responsive UI with Tailwind CSS, or working with databases using Prisma. My focus is on building scalable, reliable solutions that not only work well but look great, and I'm always looking for ways to improve my craft and deliver top-notch results.
